

Industrial, catering and medical
washing equipment

rhima
the power of clean

Why we're different ...

Rhima specialises in equipment washing systems for businesses, industries and environments where impeccable hygiene and cleanliness are essential.

That's all we do.

Our entire focus is on energy-efficient and ergonomic washing systems that deliver superior results for our clients at the lowest possible cost.

We also take environmental considerations seriously. Rhima introduced new technology to save water way back in 1990. Now it is a vital part of any system.

Rhima's ware washing experts handle every aspect of every project in house. We follow each project, right from initial consultation and design using the latest CAD software, through to installation, training, commissioning and ongoing maintenance all over Australia.

In other words, we specialise in our business, just as you specialise in yours.

How you benefit ...

A-Z project management

Whether your project is simple or extremely complex, the Rhima approach will be the same:

First, our dedicated and approachable consultants will listen to you carefully, helping to clearly identify what you want to achieve.

We will then develop a meticulously detailed list of the equipment and systems necessary to fulfil your objectives.

Our solution will minimise labour and energy costs, address environmental responsibilities and comply with all health and hygiene standards and relevant legislation.

Finally, to protect your investment, we will also make sure that the people who will be operating your washing equipment are fully trained in how to use it properly.

Rhima has a strong reputation for total project management of installations of every size, from small catering requirements to complex laboratory and industrial cleaning and disinfecting systems.

Our extensive in-house knowledge and experience enables us to take your project from the very first schematic drawing right through to full installation and ongoing maintenance, specifying exactly the right equipment and systems to meet your particular needs.

Reliable after sales service 24/7

Ongoing support is an integral part of Rhima's commitment to complete customer satisfaction.

Whether your business is large or small, in a major city or in the middle of the outback, we respond whenever you need us.

Rhima operates nationally. We have our own state service centres, with full backup support provided by a network of qualified service agents.

All centres are co-ordinated to provide 24 hour service, 7 days a week.

Our technicians are trained to service everything we supply, so all of your Rhima equipment can be attended to in a single visit.

After sales support service includes:

- Warranty
- Commissioning
- Training
- Consulting
- HACCP & infection control
- Work safety
- Preventative maintenance
- Detergent supply

Regular maintenance can be scheduled on a contract basis, if you prefer, and for complete peace of mind we can also conduct safety, hygiene and temperature tests from time to time to ensure that your equipment is operating according to required standards.

Our range of services ...

Food & general manufacturing

Crate, tub and speciality washing
Rhima's extensive range of specialised equipment includes:

- Machines specifically designed for prosciutto, salami and ham washing.
- Bread and vegetable crate washing. Rigid and collapsible crates, manual or fully robotic loading and unloading.
- 120, 240 and 1,000 litre bin washers.
- Washing machines custom designed to meet individual requirements.
- Washing and drying machines for chocolate and confectionery moulds.
- Wastewater pre-treatment systems to ensure compliance with local environmental regulations.
- In general manufacturing, the need for perfectly clean products is becoming increasingly important. Rhima's technical know-how can be applied to cleaning light engineering parts and components that need to meet high QA criteria.

In food manufacturing, high standards of hygiene and cleanliness are essential to comply with HACCP guidelines.

Hospitality & catering

Glass, dish and pot washing
Everything from small bench top washers for coffee shops to completely automated dish-handling systems for large catering operations.

The High Sparkle water purification system eliminates the need for polishing glassware and cutlery, and saves thousands of dollars in time and labour.

Granule style pot scrubbers eliminate heavy cleaning, again significantly reducing labour costs.

To further enhance efficiency in busy environments, we also supply and install a wide range of complementary systems and equipment, including:

- Transport conveyors
- Sorting tables
- Waste management systems
- Sorting & unloading robots
- Water purification
- Detergent packages
- HACCP protocols
- Personalised products

Rhima can supply whatever you need to streamline your washing processes and achieve maximum efficiency at minimum cost.

Healthcare, laboratory & pharmaceutical

Infection control, instrument and ward washing/disinfecting

Rhima offers complete infection control solutions, and hospitals in particular find it of great benefit to have one supplier for catering, ward and CSSD/TSSU washing and cleaning equipment:

- State-of-the-art washer/disinfectors for CSSD and TSSU
- Versatile human waste washer/disinfectors
- Cage washers, trolley and cart washing equipment, laboratory washers, drying cabinets etc
- Specialised machines for the medical waste industry
- Pharmaceutical IBC washers

Rhima's ward washer/disinfectors are setting new standards in infection control.

Our track record ...

Rhima is an independent Australian company drawing on 40 years' experience in solving ware washing problems.

As Australia's specialists in ware washing technology, we offer unparalleled knowledge, experience and expertise.

Since establishment in 1990, our innovative approach and 'can do' attitude - together with access to some of the world's most advanced technology - have delivered over 4,500 equipment washing solutions across a wide range of applications:

- Health care institutions
- Pharmaceutical
- Medical research
- Aged care facilities
- Restaurants
- Hotels
- Cafes & bars
- Sporting venues
- Casinos
- Schools
- Automotive
- Food processing
- Supermarkets
- Wineries
- Airlines
- Ships
- Offices
- Staff canteens
- Special manufacturing
