UNDERBENCH WASHERS

SIMPLICITY AND COMPLETENESS

The glass and dishwashers of the RU/RM series are ideal for bars, pubs, restaurants and hotels. These underbench machines have an electronic control panel, and a wide loading capacity resulting in the highest performance at a reasonable price.

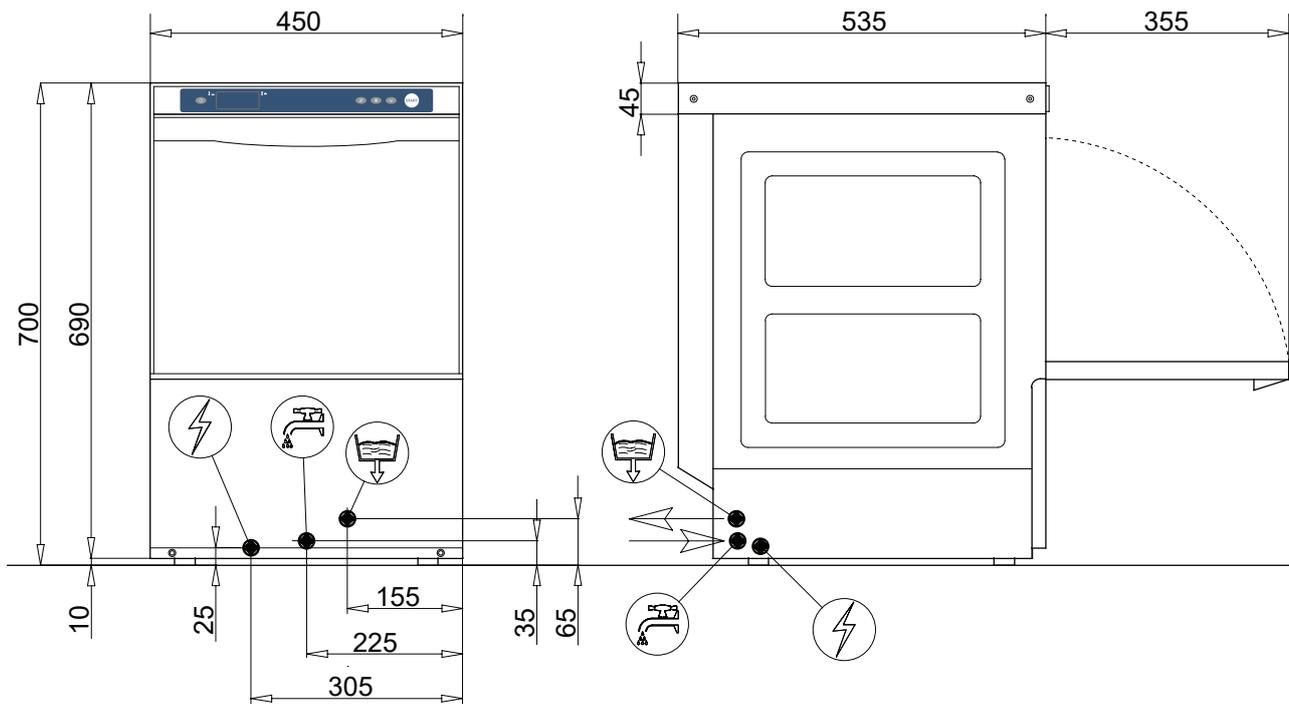

Why you should own a Rhima Dishwasher

- Fast, powerful washing cycles that leave dishes and glasses clean and sanitised in minutes
- Quality, heavy-duty construction for many years of commercial use
- Easy for kitchen staff to operate and maintain
- Clear electronic display readout
- In-built detergent and rinse additive dispenser to deliver precise dosage for optimal results
- Quiet operation
- Complies with local Water Mark standards

RU-40 UNDERBENCH DISHWASHER

The RU-40 compact dishwasher is the perfect solution for cafes, lunch rooms, tea houses, bars and offices.

BENEFITS

- Fits long glassware
- Carafes & decanters
- Fits comfortably under most existing stainless benches
- Powerful drain pump for its size
- Smart aesthetic

Rinsing temp (approx)	85°C
Rack size	500mm x 500mm
Tallest washable item	410mm
Weight (empty)	100 kg
Drain hose diameter	Ø 24mm
Water connection (Hot*)	3/4" hose

*Connect to hot water for optimum performance

RH-60 MODELS

MULTICHROME START KEY

Thanks to the MULTICHROME and FLASH light functions. The innovative multichrome and backlit key clearly shows the status of the RH-60 model.

Each Colour indicates an activity status:

HR - ENERGY RECOVERY (RH-60 MODELS ONLY)

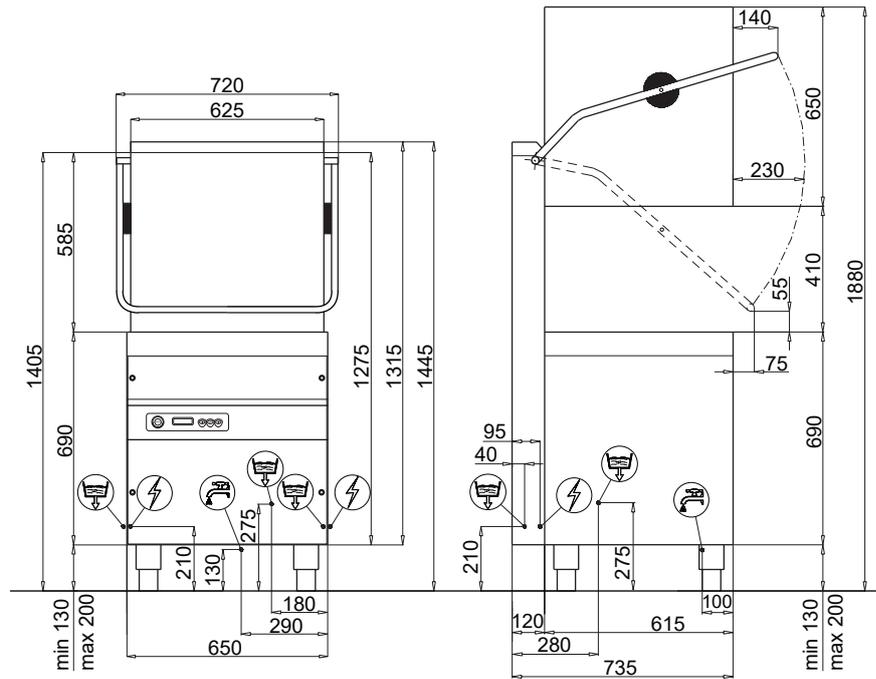

The ENERGY RECOVERY system uses the heat produced by the machine to pre-heat the infeed cold water. This is an immediate saving of about 35% on energy costs. Additionally, the kitchen environment is not subjected to the discomfort of steam and humidity.

PLUS SYSTEM ON RH-60 MODELS ONLY

The rinse cycle is stabilised at a temperature of 85°C temperature and flows at a constant pressure due to the atmospheric boiler which avoids adding fresh water from the mains. Moreover the PLUS System grants a better control and a correct dosage of rinse-aid at every cycle.

RH-60 PASS THROUGH DISHWASHER

The RH-60 Pass Through Dishwasher is suitable for medium-large sized commercial kitchens. The unique auto drain overflow system keeps main wash tank water cleaner than using traditional systems.

BENEFITS

- Perfect for large busy restaurants
- Heats quickly between washes
- Easy to operate & clean
- Powerful drain pump for quick water changes between services
- Well positioned control panel for tight spaces

**WATER
SAVING**

**ECO
FRIENDLY**

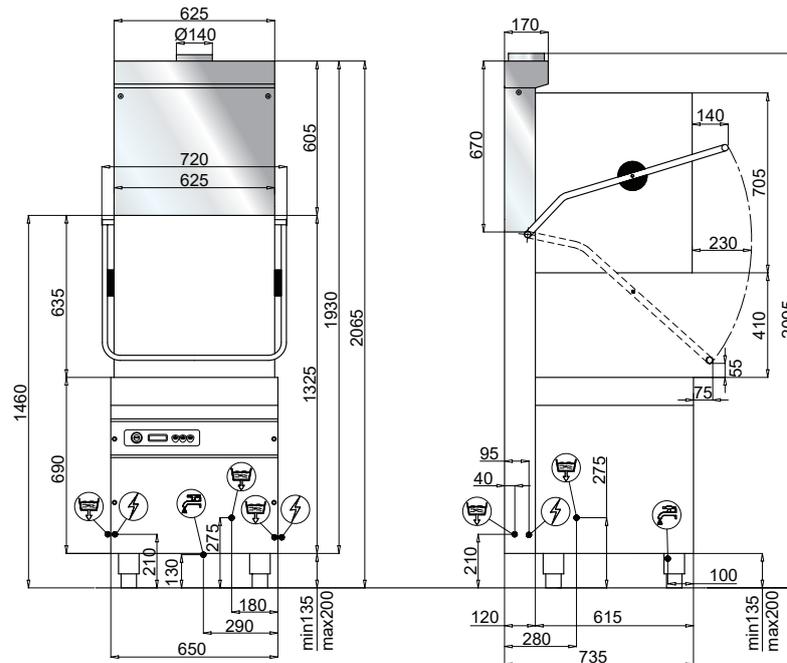

Power supply	415V 50 Hz
Total power	9.9KW
Total current	3 X 16 Amp
Wash tank capacity	20 ltrs
Water consumption (per cycle)	3.5 ltrs
Rinsing temp (approx)	85°C
Rack size	500mm x 500mm
Tallest washable item	410mm
Weight (empty)	125 kg
Drain hose diameter	Ø 24mm
Water connection (Hot*)	3/4" hose

*Connect to hot water for optimum performance

RH-60 HR PASS THROUGH DISHWASHER

The RH-60 HR Pass Through Dishwasher is suitable for medium-large sized commercial kitchens. The Heat Recovery system uses the heat produced by the machine to pre-heat the infeed cold water. This gives an immediate saving of around 35% on energy costs.

BENEFITS

- Perfect for large busy restaurants
- Heats quickly between washes, easy to operate and clean
- Powerful drain pump for quick water changes between services
- Well positioned control panel for tight spaces
- Energy saving heat recovery fitted to lower running costs and make the machine more energy efficient

**WATER
SAVING**

*Connect to hot water for optimum performance

CLEANING AND CARE

CHEMICALS FOR YOUR RHIMA EQUIPMENT

Why should I use Rhima detergents?

Rhima detergents are produced locally under strict quality control and have been specially formulated for use in Rhima washing equipment. Rhima's range of detergents and rinse additives, are full strength, concentrated products that will not only give superior wash results by allowing you to use less, but will also save you money without sacrificing quality. Please talk to us about which Rhima detergent products are perfect for your application.

MEDIWASH 5 Litre

A non caustic, non chlorine washing liquid that gives superior results in our range of glasswashers. Only to be used in combination with automatic dispensers.

This detergent is TGA approved.
Available in 2 x 5L carton.

SUPERWASH 5 Litre

A liquid washing detergent specifically designed for washing food soiled items across the hospitality and industrial industries. Only to be used in combination with an automatic dispenser. This is hazardous product.

Available in 2 x 5L carton.

FINAL RINSE 5 Litre

Automatically added to the rinse cycle of the washer to assist rapid drying and reduce spotting and streaking of plates & glassware. Only to be used with automatic dispensers.
Available in 2 x 5L carton.

RHIMA CARE

SERVICE AND MAINTENANCE FOR YOUR WASHER

Does my washer need regular service and maintenance?

Whether your Rhima washer is in or out of warranty, it needs regular professional maintenance to ensure it is operating at optimum performance.

Regular maintenance can also reduce running costs and greatly extend your washer's useful life. As importantly, a well serviced machine helps to safeguard against unexpected, inconvenient, expensive breakdowns.

Does my washer comply with HACCP guidelines?

Your Rhima washer is a commercial grade appliance that is designed to wash and sanitise your items to local council and health department guidelines. To ensure that your machine meets these requirements, it should be regularly tested by our experienced technicians who will ensure it complies with safety, hygiene and operational standards. A test report is provided for your records.

My washer needs to be fixed and it's 11AM on a Sunday morning. Who do I call?

Rhima provides professional washing equipment to professionals just like you. We understand that businesses do not all operate 9 to 5 and neither do we. Call us at anytime and a service representative will respond to your call. Our first priority is to try to get you operational over the phone, however if this is not possible, you will be given the option of waiting until the next business day to log a service call or if you can't wait, then in most cases a service technician will be arranged to attend your premises as soon as possible, usually same day.

BENEFITS OF RHIMA PREVENTATIVE MAINTENANCE

- Improved washer efficiency and reliability
- Priority service in the event of repairs being required
- Reduction in unexpected breakdowns and costly stoppages
- Savings on total maintenance costs
- Optimisation of detergent and rinse additive usage
- Prolonged service life
- 24/7 service response
- First 2 hours of labour on breakdowns*

*Callout fee applies. Not valid for faults not directly related to washer i.e. interruption to services (power, water & drainage) or operator error.

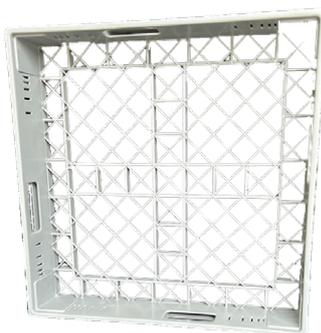

We can tailor a Rhima Care Preventative Maintenance Agreement to suit your needs including a HACCP test if required.
